-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 3 September 2004.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

Information Disclosure Statement

1. The information disclosure statement has been received and considered.

Election/Restrictions

2. Applicant's election without traverse of Species A and subspecies a1 in the reply filed on 9/3/04 is acknowledged.
3. Claims 5-8, 10, 13-15, 25-30 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected Species and subspecies, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 9/30/04.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to

Art Unit: 3683

consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 1-4,9,11,12,16-24,31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Japanese publication JP-5-77637 in view of Tanaka et al. '677.

Regarding claim 1 Japanese publication '637 discloses a bushing with which applicants are well familiar. Note the outer resin sleeve 11 and the stepped shape used to bond this to an outer member 41.

JP '677 lacks a showing of using a stepped shape on both the outer sleeve 11 and the mounting member 41.

Such an idea is taught however by Tanaka et al. '677 in the several embodiments. See for example figures 33-36.

One having ordinary skill in the art at the time of the invention would have found it obvious to have modified the device of JP '637 to include a stepped engaging face between the outer member 41 and the sleeve 11, as taught by Tanaka '677 for better securement against relative axial movement between these elements.

The limitations of claims 2-4,9,11,12,16-24,31 are fairly suggested by the combined references above.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The references cited have been cited for showing other mounts with similar design concepts to that of the invention. Please carefully review these references for their respective teachings before preparing a response to the action above.
